Giovenzana Elevator Solutions is a range of products specifically designed to be installed in elevator shafts. This new patented product range is in compliance with the **EN81.20/50**, **GOST 33984.1-2016** and **ABNT NBR NM 207-267** standards. It considerably reduces installation times and costs. **GSLC Series** is a solder-free connection solution specially designed to facilitate the installation of Giovenzana products. It uses profiled technology connectors, guaranteeing quick installation, reliability and connection sealing.

Giovenzana's new **GSLC Series flexible strips** consists of a complete range of products that are sold separately to form a customized **assembly kit**.

You can choose the codes of the components you need to install your own LED strip line from those below.

## FLEXIBLE LED STRIPS

A LED strip is a specific linear lighting solution where all the electrical and electronic components are placed on a substrate (usually a flexible PCB) and encapsulated in a material that provides mechanical and electrical insulation properties.

Giovenzana propose two different types of flexible LED strips: **GSL30** and **GSL60**.
